

# List of figures

Figure 1 Trends in age-standardized death rates.....	2
Figure 2 COPD vicious cycle .....	3
Figure 3 Functional overview of the CRNTC+ framework.....	10
Figure 4 CRNT+ experimental setup .....	13
Figure 5 Epilepsy seizure detection performance.....	14
Figure 6 COPDTrainer training approach.....	19
Figure 7 Pitch motion feature waveform .....	22
Figure 8 Illustration of the exercises selected .....	25
Figure 9 Recognition confusion for providing matching feedback in healthy subjects .....	28
Figure 10 Recognition accuracies for exercises and performance classes.....	29
Figure 11 Leg lift and Elbow circle time series plots .....	30
Figure 12 Exercise repetition counting error .....	30
Figure 13 Recognition confusion for providing matching feedback in patients .....	31
Figure 14 Patient performance error distribution for exercise repetitions .....	32
Figure 15 System feedback accuracy in the intervention study .....	32
Figure 16 Feedback efficacy of the training system during the patient intervention study.....	33
Figure 17 Daily physical activity hourly patterns (weekdays, weekend days) .....	43
Figure 18 Daily physical activity hourly patterns (stratification for mMRC, BMI, GOLD) .....	44
Figure 19 Daily physical activity hourly patterns (stratification for age, sex, LTOT) .....	45
Figure 20 Daily physical activity hourly patterns (stratification for DLCO, ADO) .....	46
Figure 21 Correlation between FEV <sub>1</sub> (% predicted) and time in VL, L, MV activities .....	47
Figure 22 The five clusters identified.....	49
Figure 23 Daily time in activities of VL, L, MV intensity by clusters of patients .....	50
Figure 24 Daily physical activity hourly pattern of clusters of patients.....	50
Figure 25 Synchronized daily physical activity hourly pattern of clusters of patients .....	51
Figure 26 Example of data recorded .....	63
Figure 27 Lying down probability distribution over hours of the day .....	64
Figure 28 Biphasic model of time in bed – time out of bed.....	65
Figure 29 Finding the start of the time in bed epochs (light off) .....	65
Figure 30 Finding the end of the time in bed epochs (lights on) .....	66
Figure 31 Segmentation of recorded days in time in bed and time out of bed .....	66
Figure 32 Flow of patients through the study .....	69
Figure 33 Impact of disease severity, dyspnoea, sex, and day on sleep parameters .....	72
Figure 34 Association between nocturnal sleep parameters and physical activity .....	75
Figure 35 Association between nocturnal sleep parameters and daytime sleep .....	76
Figure 36 Vicious cycle of deconditioning extended to nighttime .....	79
Figure 37 Graphical model for LDA.....	85
Figure 38 Procedure to create PA descriptors .....	88
Figure 39 Distribution of the routines over the terms of the vocabulary .....	92
Figure 40 Routine activation probabilities .....	93
Figure 41 Activation topic averages during weekdays and weekend days .....	95
Figure 42 Envisioned coaching system .....	97
