

List of figures

Figure 1 Trends in age-standardized death rates.....	2
Figure 2 COPD vicious cycle	3
Figure 3 Functional overview of the CRNTC+ framework.....	10
Figure 4 CRNT+ experimental setup	13
Figure 5 Epilepsy seizure detection performance	14
Figure 6 COPDTrainer training approach.....	19
Figure 7 Pitch motion feature waveform	22
Figure 8 Illustration of the exercises selected.....	25
Figure 9 Recognition confusion for providing matching feedback in healthy subjects	28
Figure 10 Recognition accuracies for exercises and performance classes.....	29
Figure 11 Leg lift and Elbow circle time series plots	30
Figure 12 Exercise repetition counting error	30
Figure 13 Recognition confusion for providing matching feedback in patients	31
Figure 14 Patient performance error distribution for exercise repetitions	32
Figure 15 System feedback accuracy in the intervention study	32
Figure 16 Feedback efficacy of the training system during the patient intervention study....	33
Figure 17 Daily physical activity hourly patterns (weekdays, weekend days)	43
Figure 18 Daily physical activity hourly patterns (stratification for mMRC, BMI, GOLD)	45
Figure 19 Daily physical activity hourly patterns (stratification for age, sex, LTOT)	46
Figure 20 Daily physical activity hourly patterns (stratification for DLCO, ADO)	47
Figure 21 Correlation between FEV ₁ (% predicted) and time in VL, L, MV activities	48
Figure 22 The five clusters identified.....	50
Figure 23 Daily time in activities of VL, L, MV intensity by clusters of patients	51
Figure 24 Daily physical activity hourly pattern of clusters of patients.....	51
Figure 25 Synchronized daily physical activity hourly pattern of clusters of patients	52
Figure 26 Example of data recorded	65
Figure 27 Lying down probability distribution over hours of the day	66
Figure 28 Biphasic model of time in bed – time out of bed.....	67
Figure 29 Finding the start of the time in bed epochs (light off).....	67
Figure 30 Finding the end of the time in bed epochs (lights on).....	68
Figure 31 Segmentation of recorded days in time in bed and time out of bed	68
Figure 32 Flow of patients through the study.....	71
Figure 33 Impact of disease severity, dyspnoea, sex, and day on sleep parameters	74
Figure 34 Association between nocturnal sleep parameters and physical activity	77
Figure 35 Association between nocturnal sleep parameters and daytime sleep	78
Figure 36 Vicious cycle of deconditioning extended to nighttime	81
Figure 37 Graphical model for LDA.....	87
Figure 38 Procedure to create PA descriptors	90
Figure 39 Distribution of the routines over the terms of the vocabulary	94
Figure 40 Routine activation probabilities	95
Figure 41 Activation topic averages during weekdays and weekend days	97
Figure 42 Envisioned coaching system	99
